

The Brixy Four™

by Perifractic.com | <http://patreon.com/perifractic> | <http://youtube.com/perifractic>

Self-ordering Instructions:

1. Download and install <http://Stud.io>
2. Download Perifractic's master file using the "download" icon [here](#) & open it
3. (Tip: How to control the camera: <https://www.bricklink.com/help.asp?helpID=2446>)
4. On the right, expand each "Step" to see all the components
5. **Choose Case Top design A/B:** Your choice depends what colours are available in each
 - a. Unlock Case Top A by clicking the "padlock" by it so other parts turn transparent
 - b. Press Ctrl+A or Command+A on your keyboard to "Select All" visible bricks
 - c. Click the colour swatch in the top-right under COLOR PALETTE
 - d. Make sure "Hide colors that are unavailable" is on/checked
 - e. Browse "available" colors & select one to apply it to all bricks. This would be the colour your order is created in. (Colours are limited due to the curved bricks.)
 - f. Deselect the bricks by clicking in a blank area
 - g. Click the "padlock" to lock Case Top A & return to the main view
 - h. Click the "eye" next to Top A to hide it, then the "eye" next to Top B to show B
 - i. Repeat from step (a) above for Case Top "B" by unlocking "B" with the "padlock" icon to browse the available colours for "B" and select a colour if B is preferred
 - j. (Optional, Advanced: change individual brick colours or choose transparent sections as each brick's availability allows, for greater colour choices)
 - k. Delete the Case Top A or B that you do NOT want using its "Trash" icon
6. **Choose a case bottom colour:** Unlock the Case Bottom using the "padlock" icon as before, and repeat the above to choose your preferred Case Bottom colour. (Do not attempt to change the colour of the "Baseplate" part.)
7. Don't want the LEGO keyboard or PCB? Make sure you delete them
8. Ensure the only parts left are those you wish to order, & the colours are as desired
9. Click the "Cart" icon in the toolbar to Add to Wanted List (requires account)
10. On the following website click "Proceed to verify items"
11. Click "Add to Wanted List"
12. Manually add an LED wire of desired length to same Wanted List via <http://bit.ly/2Ft4c9C>
13. When done click "Want" at the top of the page to see your wanted list
14. Click "Easy Buy" (LOL!) next to the list
15. Click "Create Carts", view each cart and checkout!

Have fun combining these two retro worlds! I sincerely hope you enjoy your Brixy Four.
Your friend in retro, Perifractic
